Dataset Description

제공되는 파일 설명

- train.csv: 60,000개의 데이터가 있고, 각 행은 label과 784개의 픽셀값으로 구성 (60,000 x 785)
- test.csv: 10,000개의 데이터가 있고, 각 행은 784개의 픽셀값으로 구성 (10,000 x 784)
- sample_submit.csv: submission 파일 예시

Column name과 정보

- label: 손글씨 숫자값 (0~9)
- 1×1 ~ 28×28: 컬럼명이 해당하는 위치의 픽셀값

```
# This Python 3 environment comes with many
# It is defined by the kaggle/python Docker
# For example, here's several helpful packages
import numpy as np # linear algebra
import pandas as pd # data processing, CSV file I/O (e.g. pd.read_csv)

# Input data files are available in the read-only "../input/" directory
# For example, running this (by clicking run or pressing Shift+Enter) will list all files under the input directory

import os
for dirname, _, filenames in os.walk('/kaggle/input'):
    for filename in filenames:
        print(os.path.join(dirname, filename))

# You can write up to 20GB to the current directory (/kaggle/working/) that gets preserved as output when you create a version of your notebook
# You can also write temporary files to /kaggle/temp/, but they won't be saved outside of the current directory

# Use the kagglehub client library to attach Kaggle resources like competitions, datasets, and models
# Learn more about kagglehub: https://github.com/Kaggle/kagglehub/blob/main/README.md

import kagglehub
# kagglehub.dataset_path('kaggle', 'mnist')
```

The image shows a Kaggle notebook interface. On the left, a code cell contains Python code for setting up a Kaggle environment and listing files in the input directory. On the right, a 'Share' dialog is open, showing options to set the notebook's visibility to 'Private' or 'Public'. Below these options is a search bar labeled 'Share with people or groups'. A red arrow points from the code cell to this search bar. Below the search bar, a list of users is shown, including 'Jaeyun Lee' and 'Yukyung Choi', each with a 'PERMISSION' dropdown menu. The 'PERMISSION' for 'Jaeyun Lee' is set to 'Owner', and for 'Yukyung Choi' it is set to 'Can view'. At the bottom of the dialog, there are 'Cancel' and 'Save' buttons.

```

4. 노트북 설정 (3) 코드 실행 및 저장

The screenshot shows a Jupyter Notebook interface with a menu bar (File, Edit, View, Run, Settings, Add-ons, Help) and a toolbar with icons for file operations and execution. The code cell contains the following text:

```
# This Python 3 environment comes with many helpful analytics libraries installed
# It is defined by the kaggle/python Docker image: https://github.com/kaggle/docker-python
# For example, here's several helpful packages to load

import numpy as np # linear algebra
import pandas as pd # data processing, CSV file I/O (e.g. pd.read_csv)

# Input data files are available in the read-only "../input/" directory
# For example, running this (by clicking run or pressing Shift+Enter) will list all files under the input directory

import os
for dirname, _, filenames in os.walk('/kaggle/input'):
    for filename in filenames:
        print(os.path.join(dirname, filename))

# You can write up to 20GB to the current directory (/kaggle/working/) that gets preserved as output when you create a new version
# You can also write temporary files to /kaggle/temp/, but they won't be saved outside of the current session

# Use the kagglehub client library to attach Kaggle resources like competitions, datasets, and models to your session
# Learn more about kagglehub: https://github.com/Kaggle/kagglehub/blob/main/README.md

import kagglehub
# kagglehub.dataset_download('<owner>/<dataset-slug>')
```

At the bottom of the code cell, there are two buttons: "+ Code" and "+ Markdown".

The screenshot shows a "Save version" dialog box with the following fields:

- VERSION NAME:** A text input field containing "Version 1".
- VERSION TYPE:** A dropdown menu with the option "Save & Run All (Commit)" selected. This section is highlighted with a red border.
